A SMARTER TOMORROW WITH CRYPTO

WHAT IS CRYPTO TRADING?

Cryptocurrency trading is the act of speculating on cryptocurrency price movements via a **CFD trading account**, or buying and selling the underlying coins via an exchange.

Cryptocurrency markets are ***decentralized,*** which means they are not issued or backed by a central authority such as a government. Instead, they run across a network of computers.

However, cryptocurrencies can be bought and sold via exchanges and stored in 'wallets'.
